Keyham Green Places

The Big Greenspace Challenge is jointly run by South Hams District Council and Plymouth City Council to enhance parks and other greenspaces in the area. The scheme is supported by the Langage Landscape Fund from the development of the Langage Energy Centre at Plympton by Centrica

Keyham Community Garden

at Knowle Avenue Allotments

Did you know there is a community garden at Knowle Avenue Allotments? Come to some of the events listed overleaf and find out more.

Did you know lots of fruit trees and bushes have been planted there?

In 2014, members of the community and children from Keyham Barton Primary School and Peter Pan Nursery all helped to plant apple trees, cherry trees, grape vines, currant bushes and gooseberry bushes in the community garden. In 2015, a **fruiting hedge** was planted.

Paul Keller, manager at **Keyham Green Places**, is keen to build on the legacy of the late Sandie Morrison. Sandie, a much loved community worker, worked tirelessly to secure this area for the community to grow food and for wildlife to enjoy. You can help continue this legacy.

Planting fruiting hedge with children from Peter Pan nursery

All these activities were supported by Keyham Green Spaces, Knowle Avenue Allotment association, local volunteers and funded through the Big Green Spaces Challenge with support from Plymouth City Council.

A series of community days and **'Go for it'** days have been organized to continue to build on the achievements and to help make the site even better. These open days are an opportunity to meet people with a common interest, share your skills and learn about gardening and wildlife.

Please turn over this page to see the events planned for February and March.
